

TRANSPARENCY FOR CLIMATE ACTION IN G20 COUNTRIES

WHO WE ARE

Climate Transparency is a global partnership with a shared mission to stimulate a 'race to the top' in G20 climate action and to shift investments towards zero carbon technologies through enhanced transparency.

WHAT WE DO

Joint assessment to increase transparency

Climate Transparency brings together the most authoritative climate assessments and expertise of stakeholders from G20 countries. Jointly, these experts develop a credible, comprehensive and comparable picture on G20 climate performance: The **Brown to Green Report** covers easy-to-use information on all major areas such as mitigation and climate finance and includes detailed factsheets on all G20 countries. It is published on an annual basis on the eve of the G20 Summit.

Empowering change agents

Climate Transparency aims to increase awareness and peer pressure among policy-makers in G20 governments and influencers from civil society and the financial sector on a national and international level.

Activities of the global partnership to empower change agents include international and country-specific media work, direct communication with decision makers and G20 groups as well as workshops in G20 countries.
